

The background features a dark, textured surface with a subtle halftone dot pattern. Four large, translucent, iridescent shapes resembling liquid or plasma filaments are positioned at the corners and bottom right of the frame, creating a sense of depth and motion.

SMU_BIA

TEAM UNTITLED

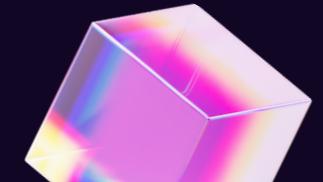

Every day, ISD is flooded with news articles, case studies, and intelligence reports.

Manually analyzing this data is slow, inefficient, and risks missing key signals

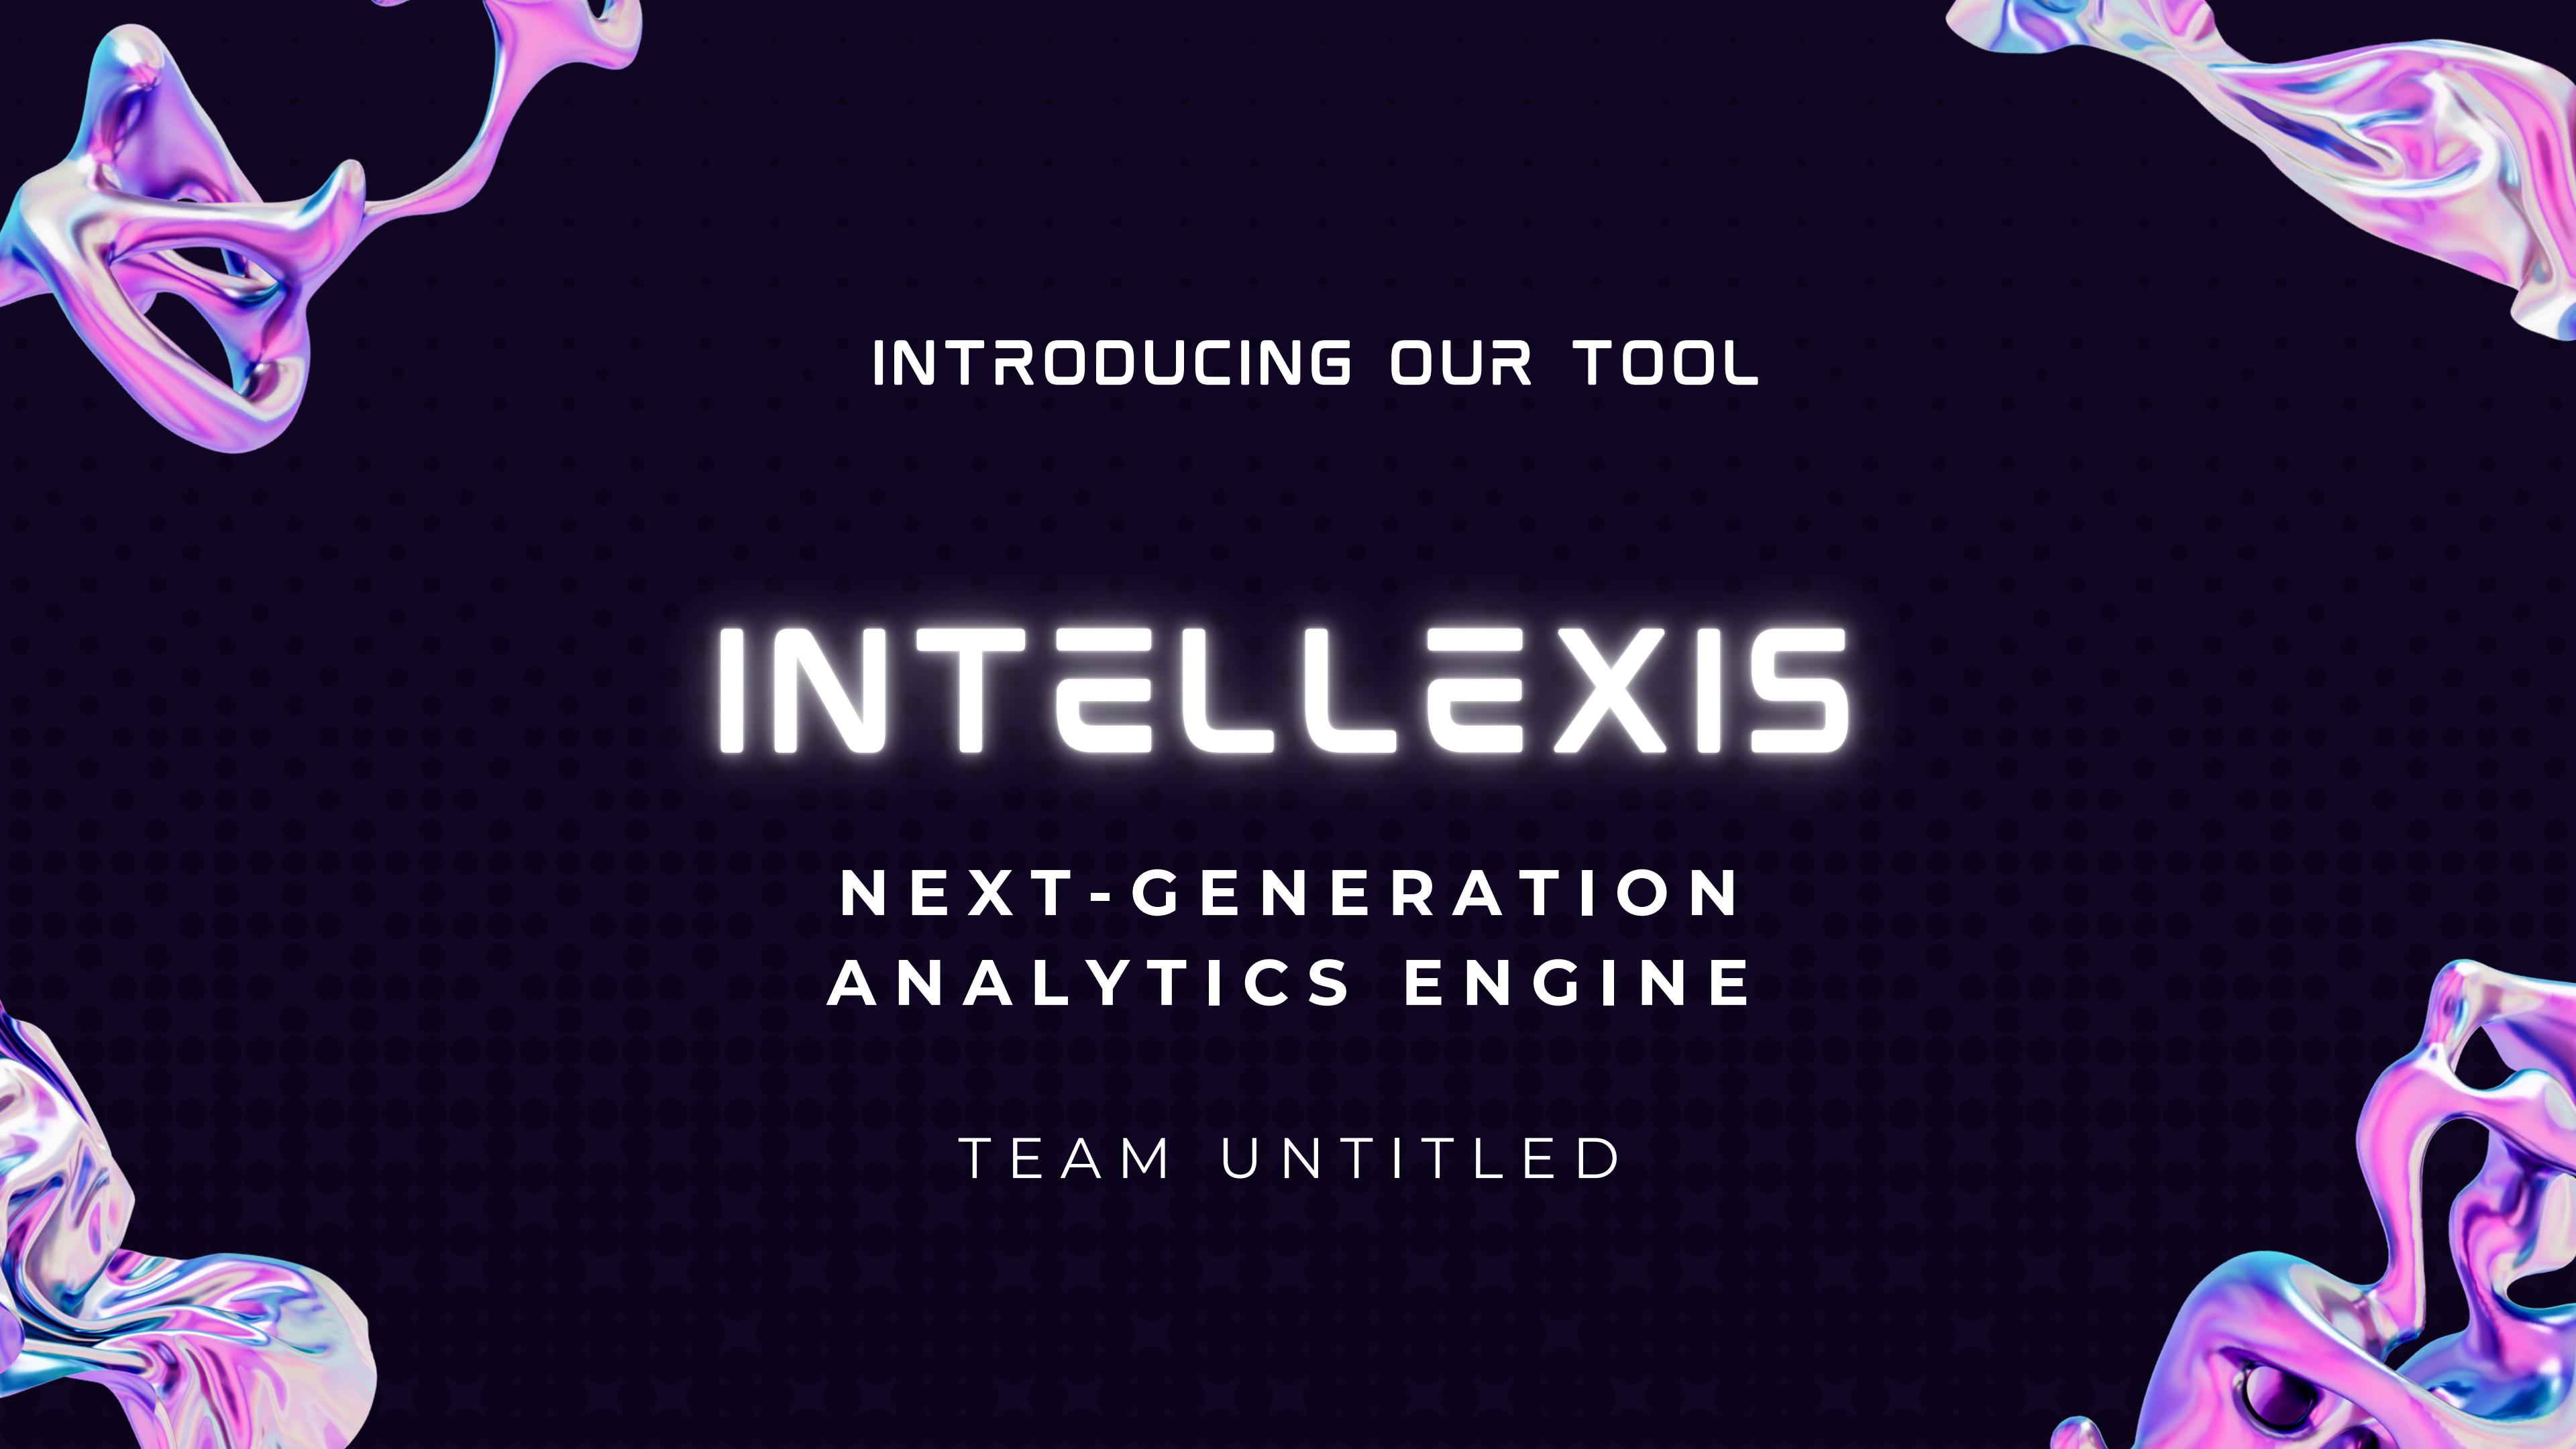

Hidden inside this unstructured data are **critical threats, hidden connections, and emerging risks.**

"WHAT IF YOU HAD AN AI-POWERED ANALYST THAT COULD INSTANTLY TRANSFORM THIS CHAOS INTO CLARITY?"

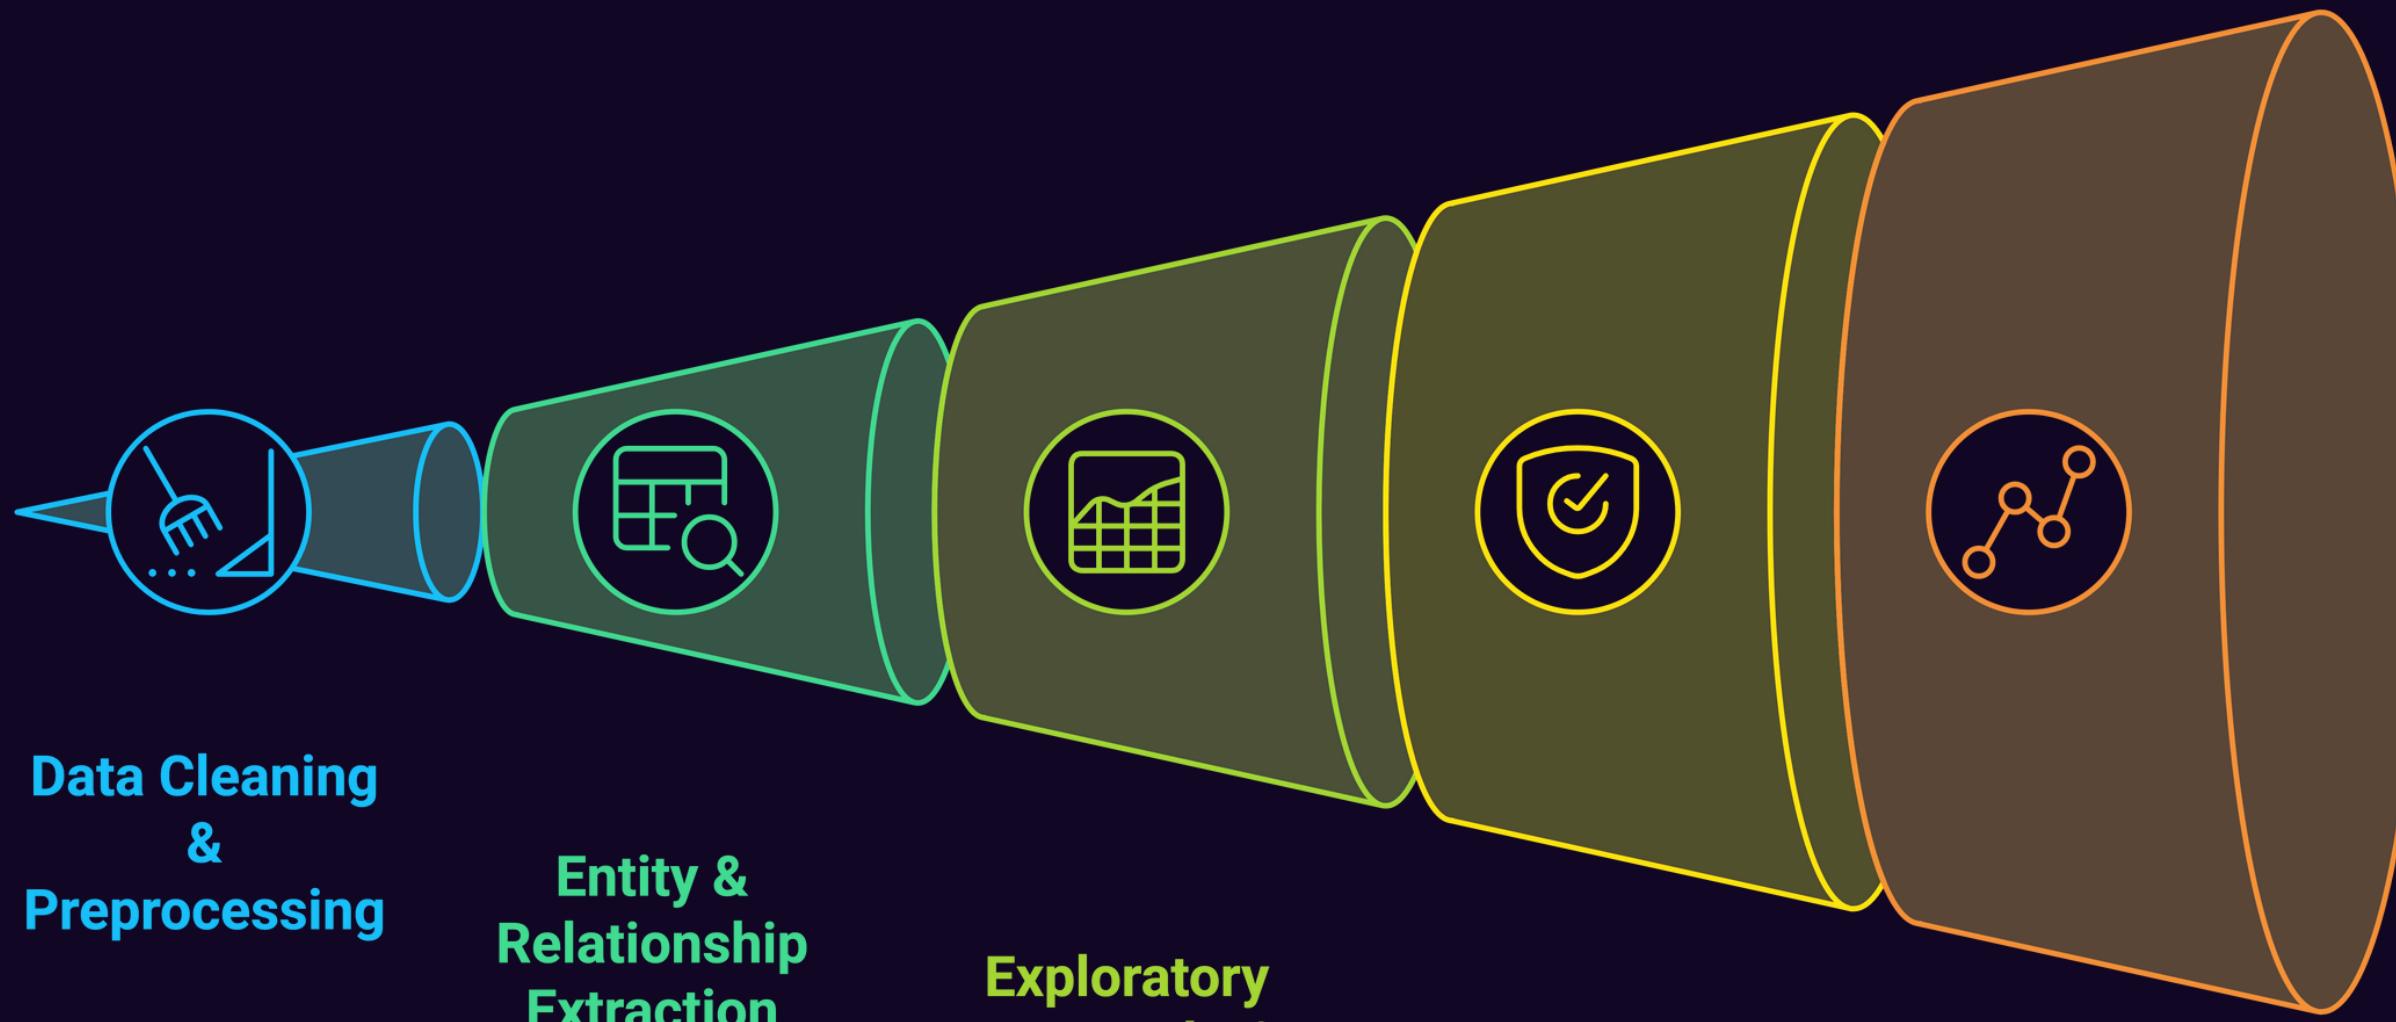

INTRODUCING OUR TOOL

INTELLEXIS

NEXT-GENERATION
ANALYTICS ENGINE

TEAM UNTITLED

HOW WE DID IT?

Data Cleaning & Preprocessing

- REMOVED REDUNDANCIES
- NORMALIZED FORMATS TO ENSURE ACCURACY.

Entity & Relationship Extraction

- EXTRACTED MEANINGFUL ENTITY-RELATIONSHIPS USING AZURE'S OPENAI API

Exploratory Data Analysis

- SENTIMENT ANALYSIS
- EXTRACTED SUBJECTIVITY & POLARITY
- GENERATED CORRELATION MATRIX, WORDCLOUD ETC.

Risk Scoring System

- CALCULATES RISK SCORES FOR COUNTRIES INTERACTING WITH SINGAPORE,

Network Graphs

- PROVIDES VISUAL AID TO SEE ALL RELATIONSHIPS

DEMO

WHAT DOES THIS MEAN FOR ISD?

ACCELERATED INTELLIGENCE GATHERING

Extracts key insights from overwhelming data in seconds.

STRONGER THREAT DETECTION

Identifies risks from misinformation, extremism, and cyber threats.

DEEPER NETWORK ANALYSIS

Uncovers hidden connections between individuals, organizations, and events.

DATA-DRIVEN DECISION MAKING

Empowers ISD with clear, actionable intelligence for faster response.

SCALABLE & REAL-TIME

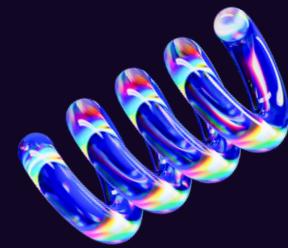

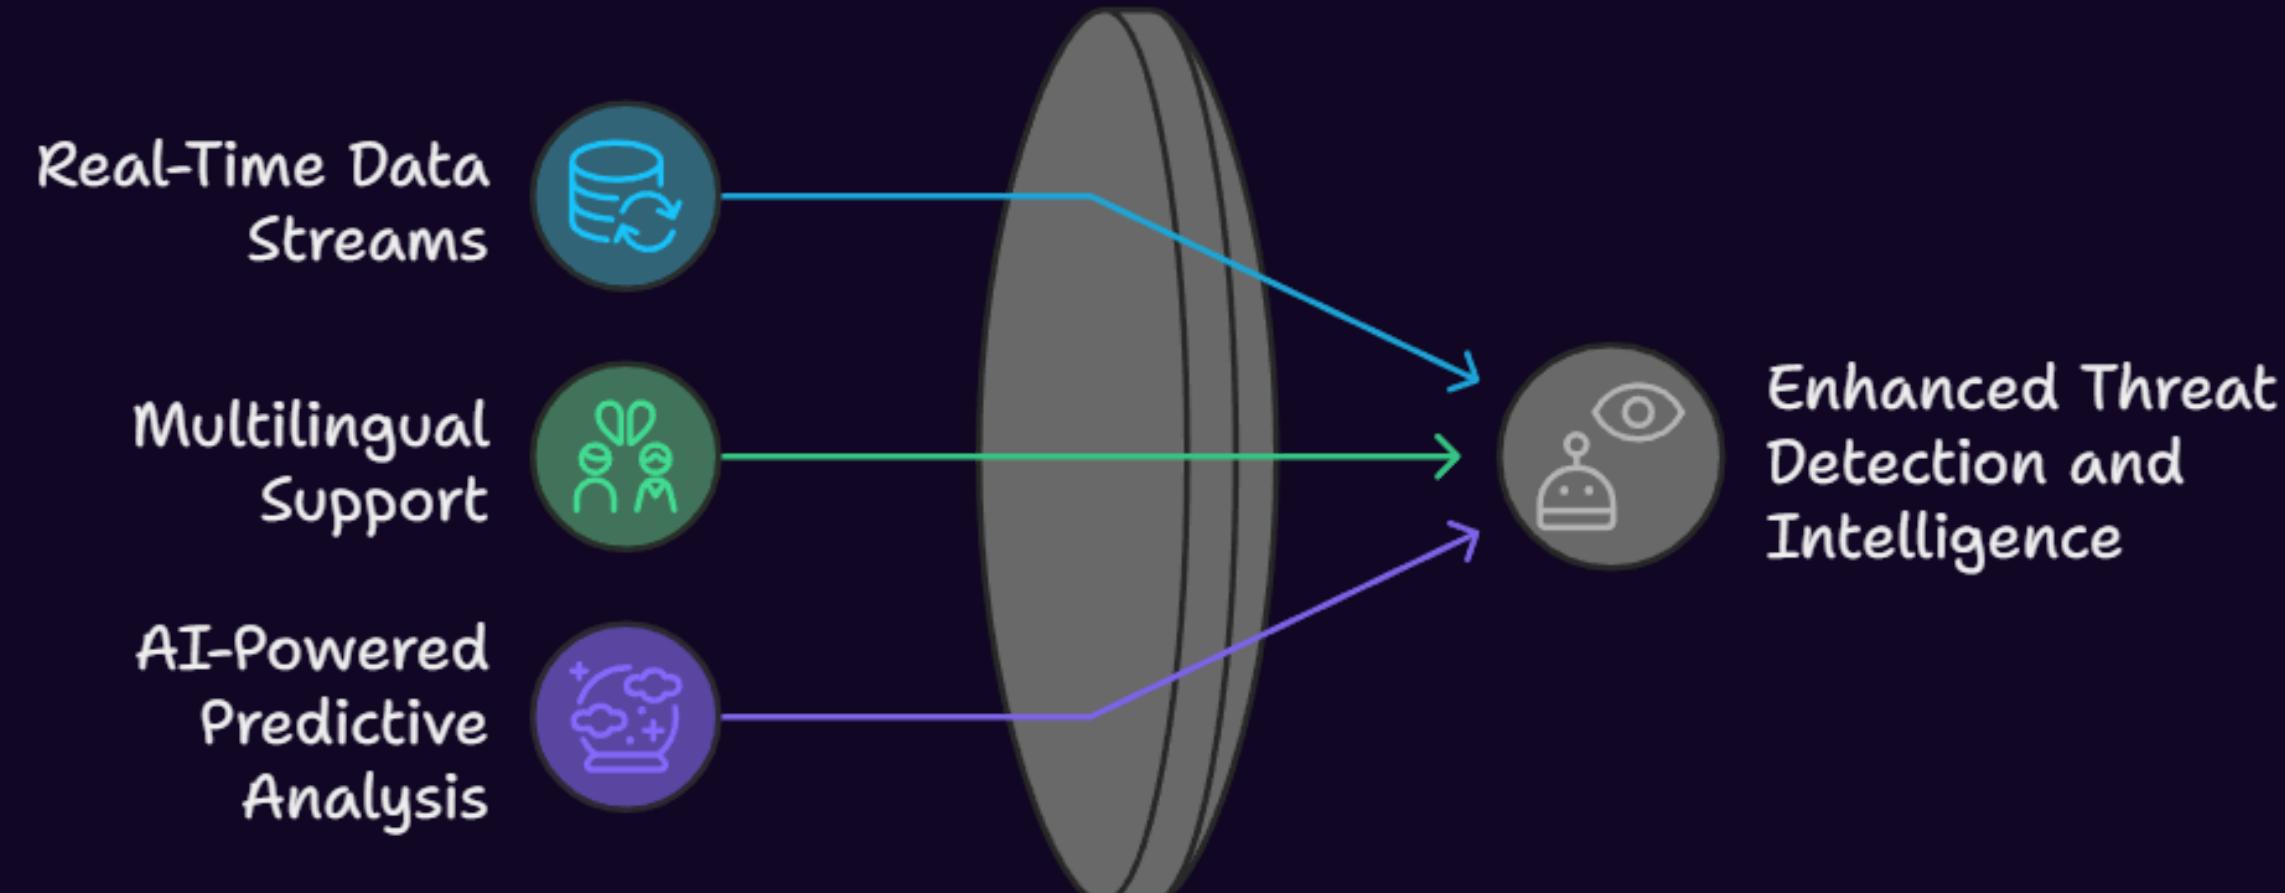

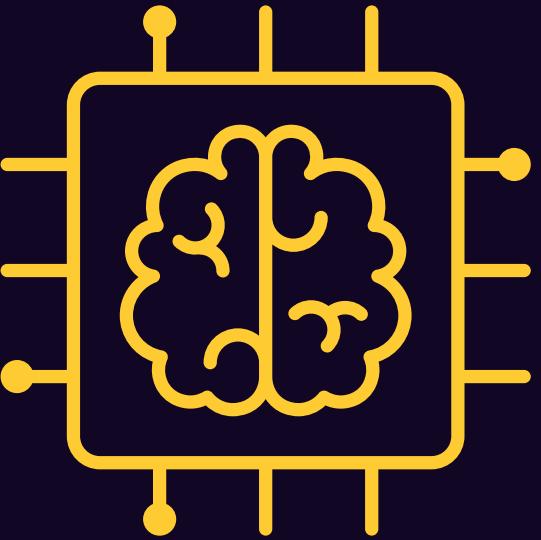

Enables on-demand analysis with custom uploads and potential for live monitoring

WHAT'S NEXT?

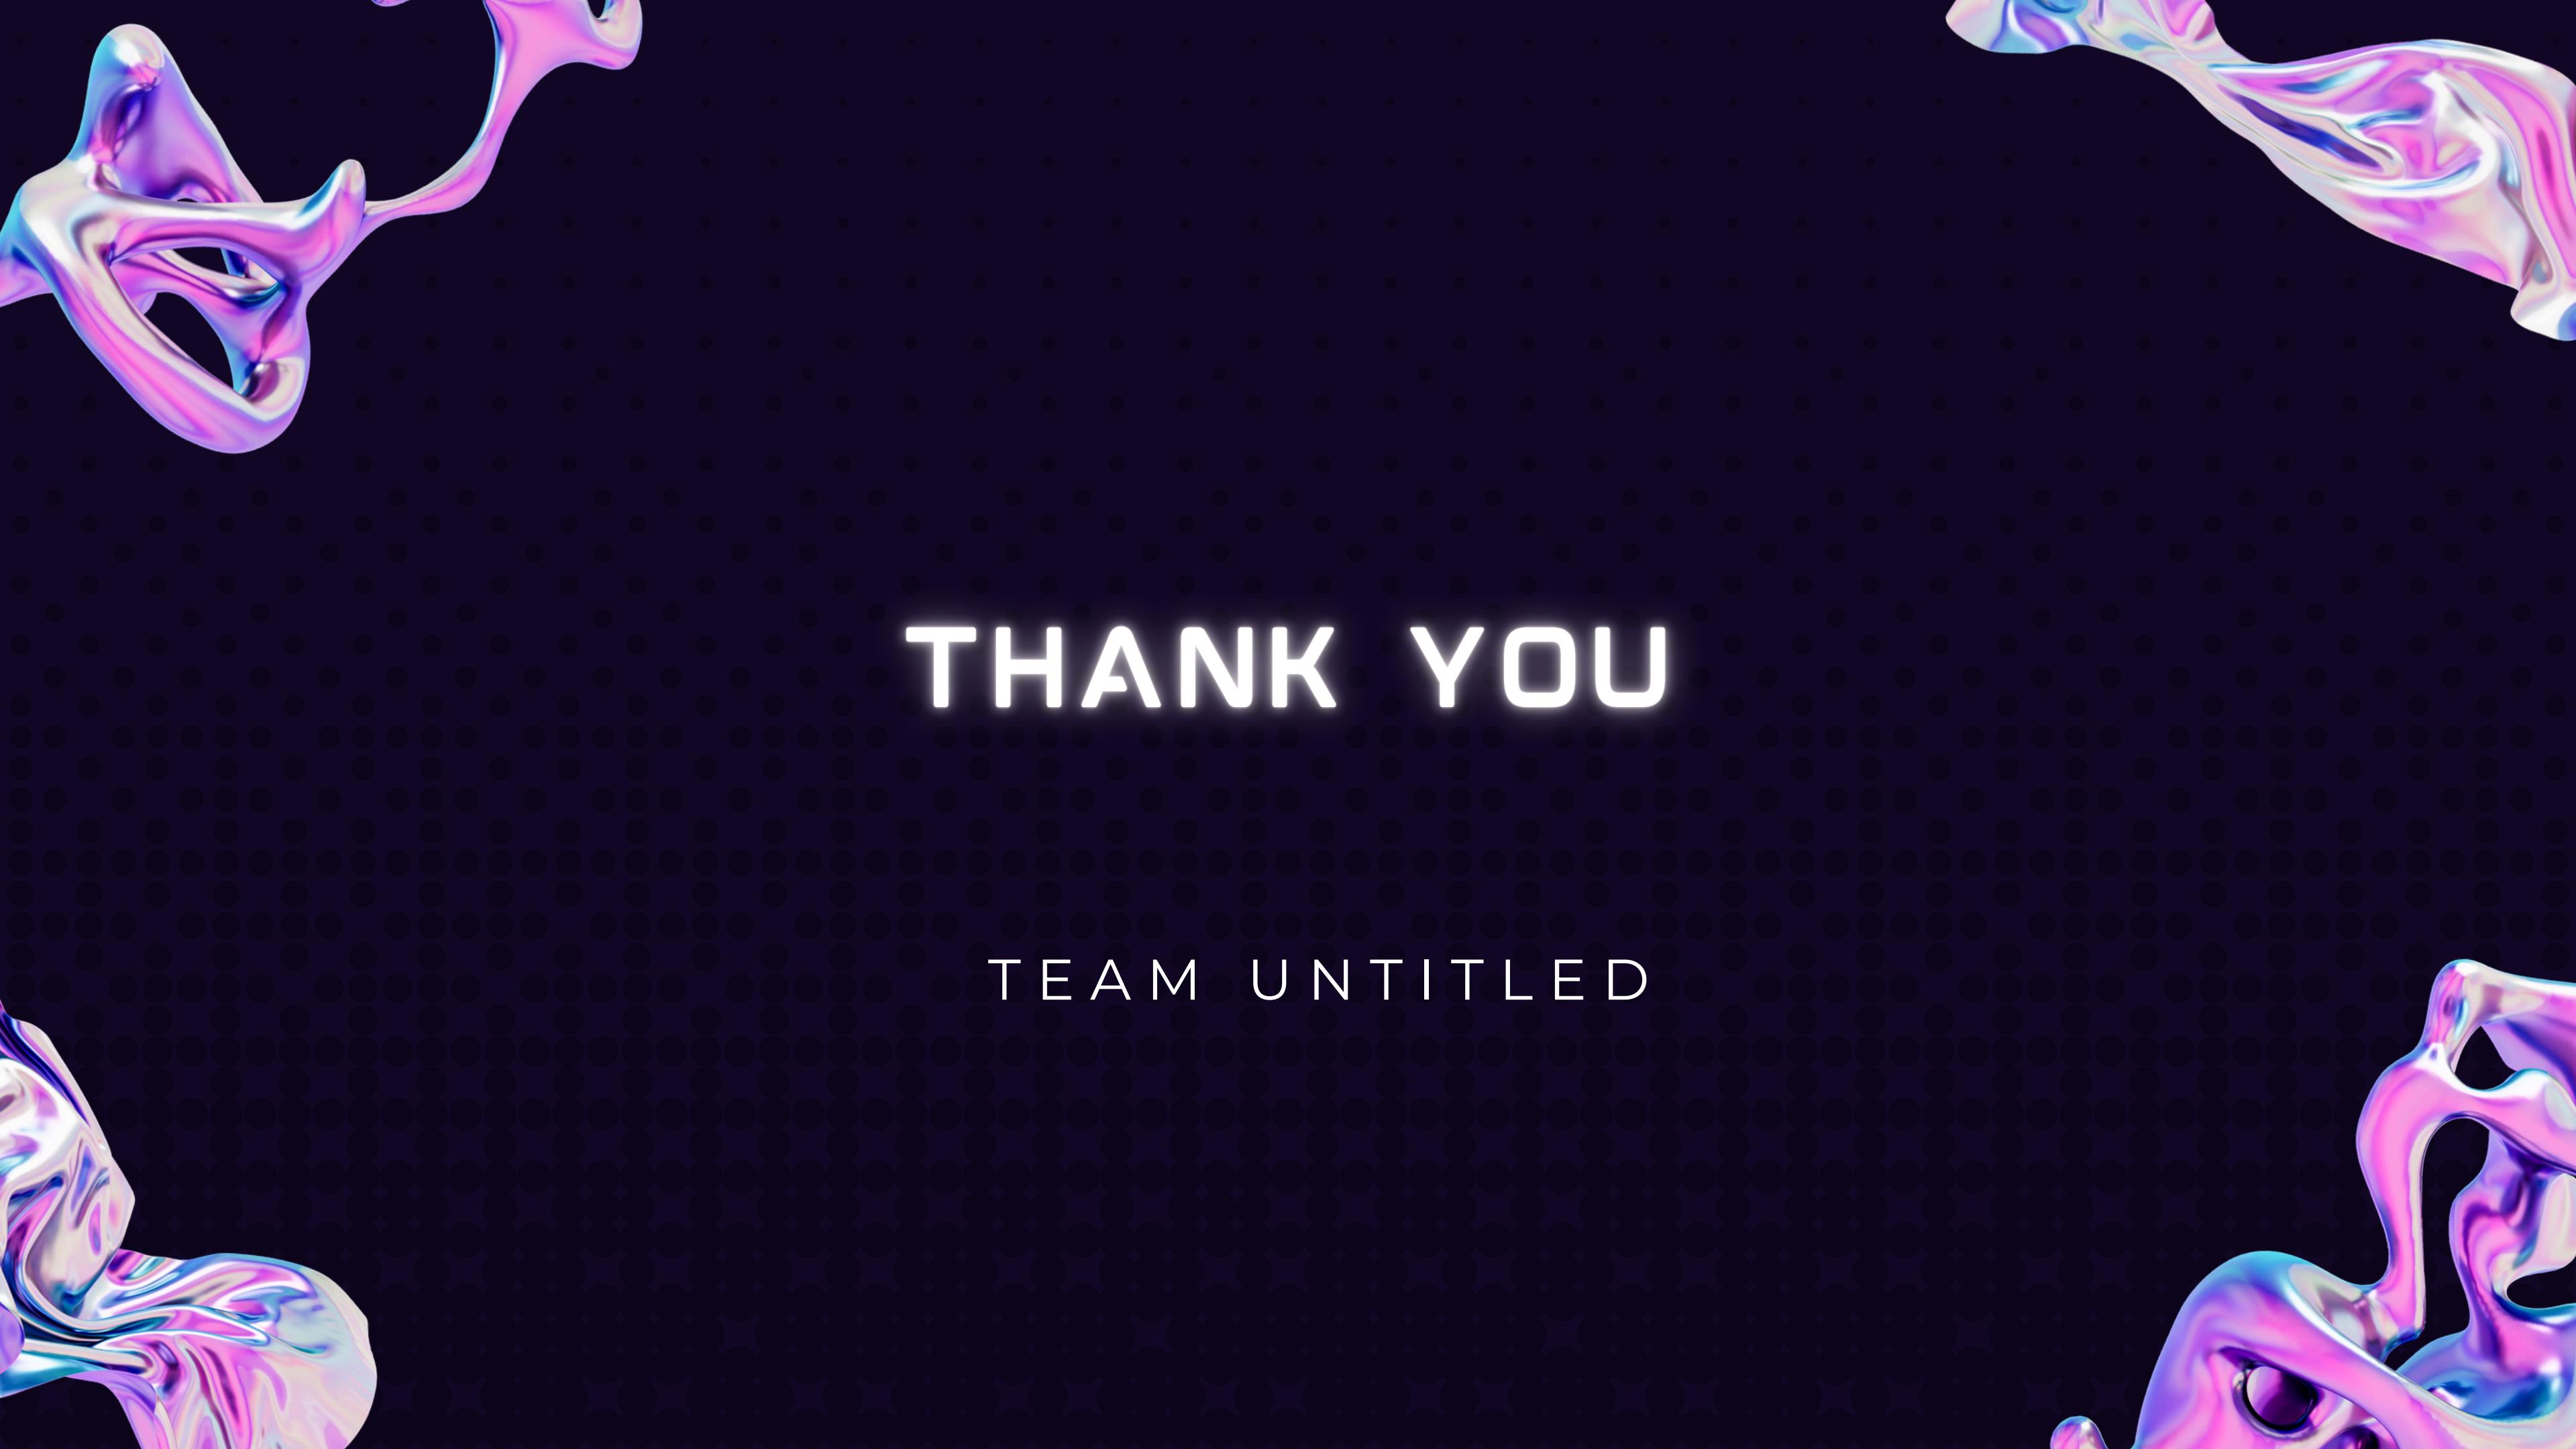

Unified Threat Intelligence Strategy

🎯 "ACTIONABLE INSIGHTS. REAL-TIME INTELLIGENCE.
FUTURE-READY SECURITY."
💡 "LET'S BUILD A SAFER FUTURE—TOGETHER."

The background features a dark, textured surface with a subtle halftone dot pattern. Four large, translucent, iridescent shapes resembling liquid or plasma filaments are positioned at the corners and center of the frame, creating a sense of depth and motion.

	id	entity1	relationship	entity2
0	0	Starbucks	violated	federal labor law

This comprehensive network graph maps all the extracted entities and their interrelationships, capturing a wide array of connections across organizations, individuals, and countries. By including all relationships in the dataset, it provides a broader view of how different entities intersect and influence each other. This holistic approach allows for a deeper understanding of global dynamics, as it can uncover hidden patterns, such as alliances, power structures, or key figures linking multiple regions or sectors. It is useful for understanding complex geopolitical networks and the underlying connections shaping current global narratives.

1. Risk Summary for China:
- Risk Score:** 8.5
 - Reasoning:** China has a high risk score due to its frequent mentions in relation to national security concerns, particularly regarding its laws and international relations. The dataset highlights tensions with India and mentions of restrictive measures, indicating a complex geopolitical landscape. The sentiment surrounding China appears to be largely negative, reflecting concerns over its assertive policies and their implications for regional stability.
